

EarthSoft Announces State of Tennessee DEC Contract

August 21, 2009 – EarthSoft today announced it has received a contract from state of Tennessee Department of Environmental Conservation for its EQuIS software in Oracle. TN DEC ordered a Distribution License of EDP, the DMR module, several EQuIS Enterprise modules, EQuIS for ArcGIS, and Training.

EarthSoft's EQuIS is the most widely used environmental data management software in the world. Many government agencies, industrials, and consultants use EQuIS for groundwater, surface water, limnology, eco-risk, and other sample data. EQuIS improves environmental data quality significantly, with Total Quality Management techniques applied to workflow. EQuIS is being used for WQX, replacing STORET, for several state governments.

EarthSoft EQuIS Data Processor (EDP) and Enterprise EDP provide closed-loop workflow for the checking, delivery, and receipt of electronic data deliverables (EDDs). Over 400 labs world-wide already have EDP, and several US EPA Regions and states distribute EDP at no charge to their labs. Enterprise EDP provides a web dashboard for automated workflow. Enterprise EDP is for those organizations that process many EDDs every month and want to check the EDDs for security and correctness, minimizing the human involvement.

EQuIS for ArcGIS provides advanced decision support and data analysis, supporting query building and creation of "spider diagrams" with advanced labeling of maps. EQuIS for ArcGIS has interfaces to many of the commonly used environmental graphics tools.

EarthSoft's EZView and Environmental Information Agents (EIAs) offer easy web interfaces for building new reports, serving up existing reports, and pushing these reports via email when date or data-driven triggers are tripped. This Build – Serve – Push workflow automation enables organizations to generate and deliver far more reports and graphics than previously possible, and can scale for very large organizations.

About EarthSoft:

EarthSoft provides open, innovative software solutions for managing sample/technical data for laboratories, consultants/engineers, owner/operators, governments, responsible parties and other stakeholders. For more information write info@earthsoft.com, or visit www.earthsoft.com.
