

Sydney: August 7th—9th 2013
SRIT Professional Short Course Series

The EQUS Open Training Course will provide the skills and techniques for managing and analyzing environmental data using EarthSoft's Environmental Quality Information System (EQUS).

Attendees will gain hands-on experience working with environmental geology and chemistry analytic data. Workflow automation and web techniques will be covered using EQUS Enterprise. Students will learn how to create advanced crosstab reports with EQUS Professional. You will use the EQUS Data Gathering Engine (EDGE) for collecting environmental field data, creating standardized chains of custody and generating electronic data deliverables (EDDs) to import into EQUS.

Attendees will learn how to use EQUS Sample Planning Module (SPM) creating future tasks, adding contracts, methods and labs and creating sample analysis plans complying with EPA standards. You will also learn how to check the completeness of scheduled sampling and non-sampling field activities. EQUS for ArcGIS and EnviroInsite will also be reviewed. While much of the class will be focused on the implementation and use of EQUS, discussion will also include critical data management principles such as:

- Developing standard operating procedures for data management best practices
- Creating Sample Plans
- Action Levels and Valid Values
- Working with analytical labs
- Field workflows and data collection standards and practices
- Reports, Graphs, Graphics, Crosstabs, CAD and GIS exports

Who should attend?

Anyone currently using the EQUS suite of tools or interested in seeing how well they could work for their organization.

What do you get?

- Instruction and hands-on use of EQUS installed on your laptop/notebook computer
- Access to world-class experts in the use of the EQUS suite
- Comprehensive printed course notes
- USB containing the tutorials, course notes and other documentation
- Buffet Lunch and morning/afternoon tea each day
- Networking with other environmental professionals

- Enjoy a professional training environment
